Profile

I am an enthusiastic individual seeking an internship which will allow me to enhance my skills in technology. I have very good problem-solving and project management skills, in addition to having excellent knowledge in C++, Java, MySQL and other programming languages. I want to apply my skill sets, knowledge & ideas regarding technology in a real workplace within a team of experienced professionals. I am a Computer Science student having a firm grasp of the science underpinning computer and software systems along with practical experience developing applications using the latest generation of technology. I have gained presentation, teamwork, and time management skills whilst working to deadlines which are transferable into my professional career and will help me to perform effectively in my role. I see myself as self-motivated, committed and determined to achieve my goals. I have a hunger to learn and develop myself within all the critical aspects of information technology.
